MR. JOHN C. PERRAPATO

DEPUTY PROGRAM EXECUTIVE OFFICER

COMMAND, CONTROL, AND COMMUNICATIONS TACTICAL

Mr. Perrapato is a member of the Senior Executive Service and is serving as Deputy Program Executive Officer, Command, Control and Communications Tactical (PEO C3T). The PEO is responsible for overseeing the management of the Army Battle Command Systems (ABCS) and their supporting communications infrastructure commonly referred to as the Warfighter Information Network and Tactical Internet. Additionally the PEO C3T is charged with ensuring ABCS horizontal and vertical integration as well as joint service interoperability.

Prior to entering the Senior Executive Service, Mr. Perrapato served as Project Manager, Tactical Radio Communications Systems (PM TRCS) responsible for the life cycle management of numerous Army radio programs. His responsibilities included the integration of these products into a seamless “Systems of Systems” known as the Tactical Internet. He has over thirty years experience in the Defense Acquisition business, predominately in the field of Program Management. He has served as Deputy Project Manager and Chief Engineer in numerous program offices, including TRCS, SINCGARS and Automatic Test Support Systems. He has also served as Chief, Horizontal Technology Integration (HTI) office on the staff of the PEO C3S.

Mr. Perrapato has both a Bachelors and Masters degree in Electrical Engineering from Rutgers University. He is the recipient of numerous meritorious awards including two Commanders’ Awards. His hobbies include golf and tennis.

He and his wife Donna, reside in Brick, NJ. They have three daughters, Jamie, Christie and Jill.

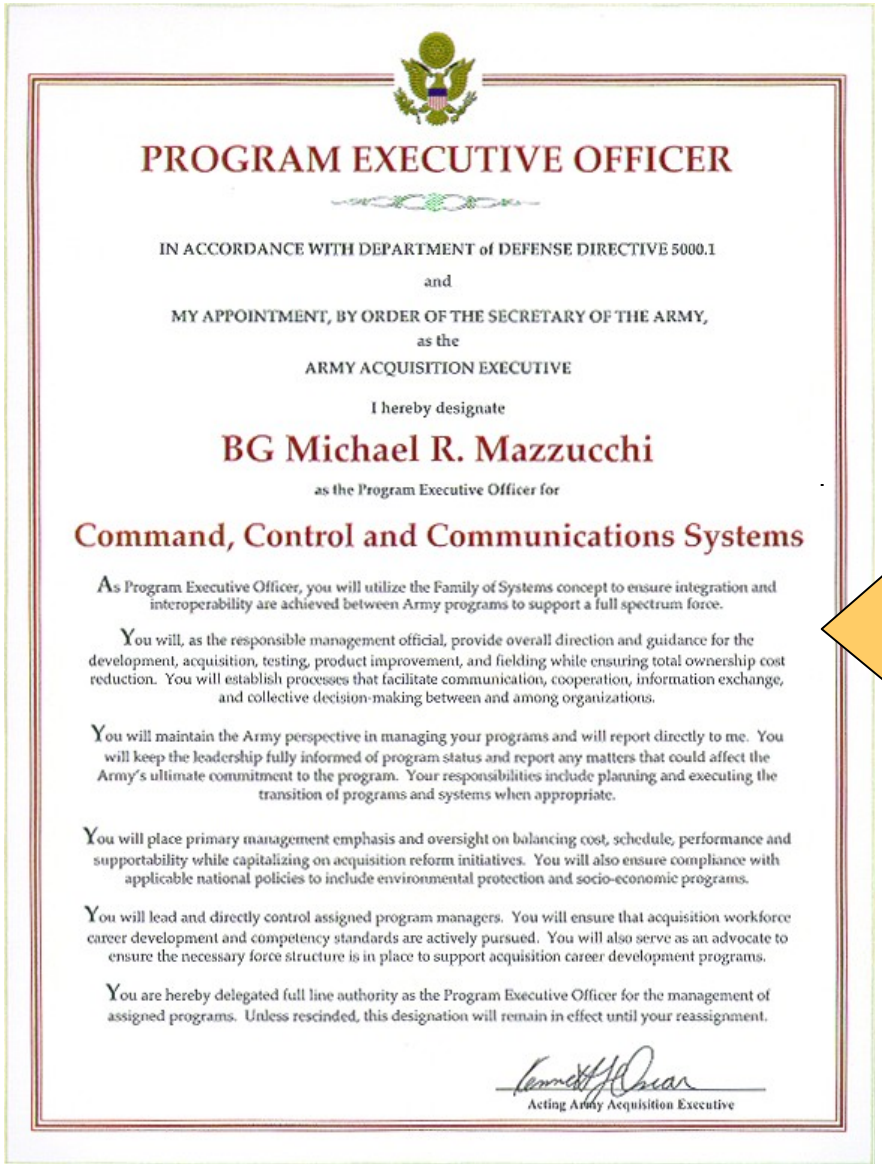
Overview

May 2002

Mr. John Perrapato

Deputy Program Executive Officer
Command, Control and Communications Tactical

PEO Charter



PROGRAM EXECUTIVE OFFICER

IN ACCORDANCE WITH DEPARTMENT of DEFENSE DIRECTIVE 5000.1

and

MY APPOINTMENT, BY ORDER OF THE SECRETARY OF THE ARMY,

as the

ARMY ACQUISITION EXECUTIVE

I hereby designate

BG Michael R. Mazzucchi

as the Program Executive Officer for

Command, Control and Communications Systems

As Program Executive Officer, you will utilize the Family of Systems concept to ensure integration and interoperability are achieved between Army programs to support a full spectrum force.

You will, as the responsible management official, provide overall direction and guidance for the development, acquisition, testing, product improvement, and fielding while ensuring total ownership cost reduction. You will establish processes that facilitate communication, cooperation, information exchange, and collective decision-making between and among organizations.

You will maintain the Army perspective in managing your programs and will report directly to me. You will keep the leadership fully informed of program status and report any matters that could affect the Army's ultimate commitment to the program. Your responsibilities include planning and executing the transition of programs and systems when appropriate.

You will place primary management emphasis and oversight on balancing cost, schedule, performance and supportability while capitalizing on acquisition reform initiatives. You will also ensure compliance with applicable national policies to include environmental protection and socio-economic programs.

You will lead and directly control assigned program managers. You will ensure that acquisition workforce career development and competency standards are actively pursued. You will also serve as an advocate to ensure the necessary force structure is in place to support acquisition career development programs.

You are hereby delegated full line authority as the Program Executive Officer for the management of assigned programs. Unless rescinded, this designation will remain in effect until your reassignment.

Acting Army Acquisition Executive

…development, acquisition, testing, systems integration, product improvement and fielding of assigned programs.

Mission Statement

To rapidly develop, field, and support leading edge, survivable, secure and interoperable tactical, theater and strategic command and control and communications systems through an iterative, spiral development process that results in the right systems, at the right time and at the best value to the warfighter.

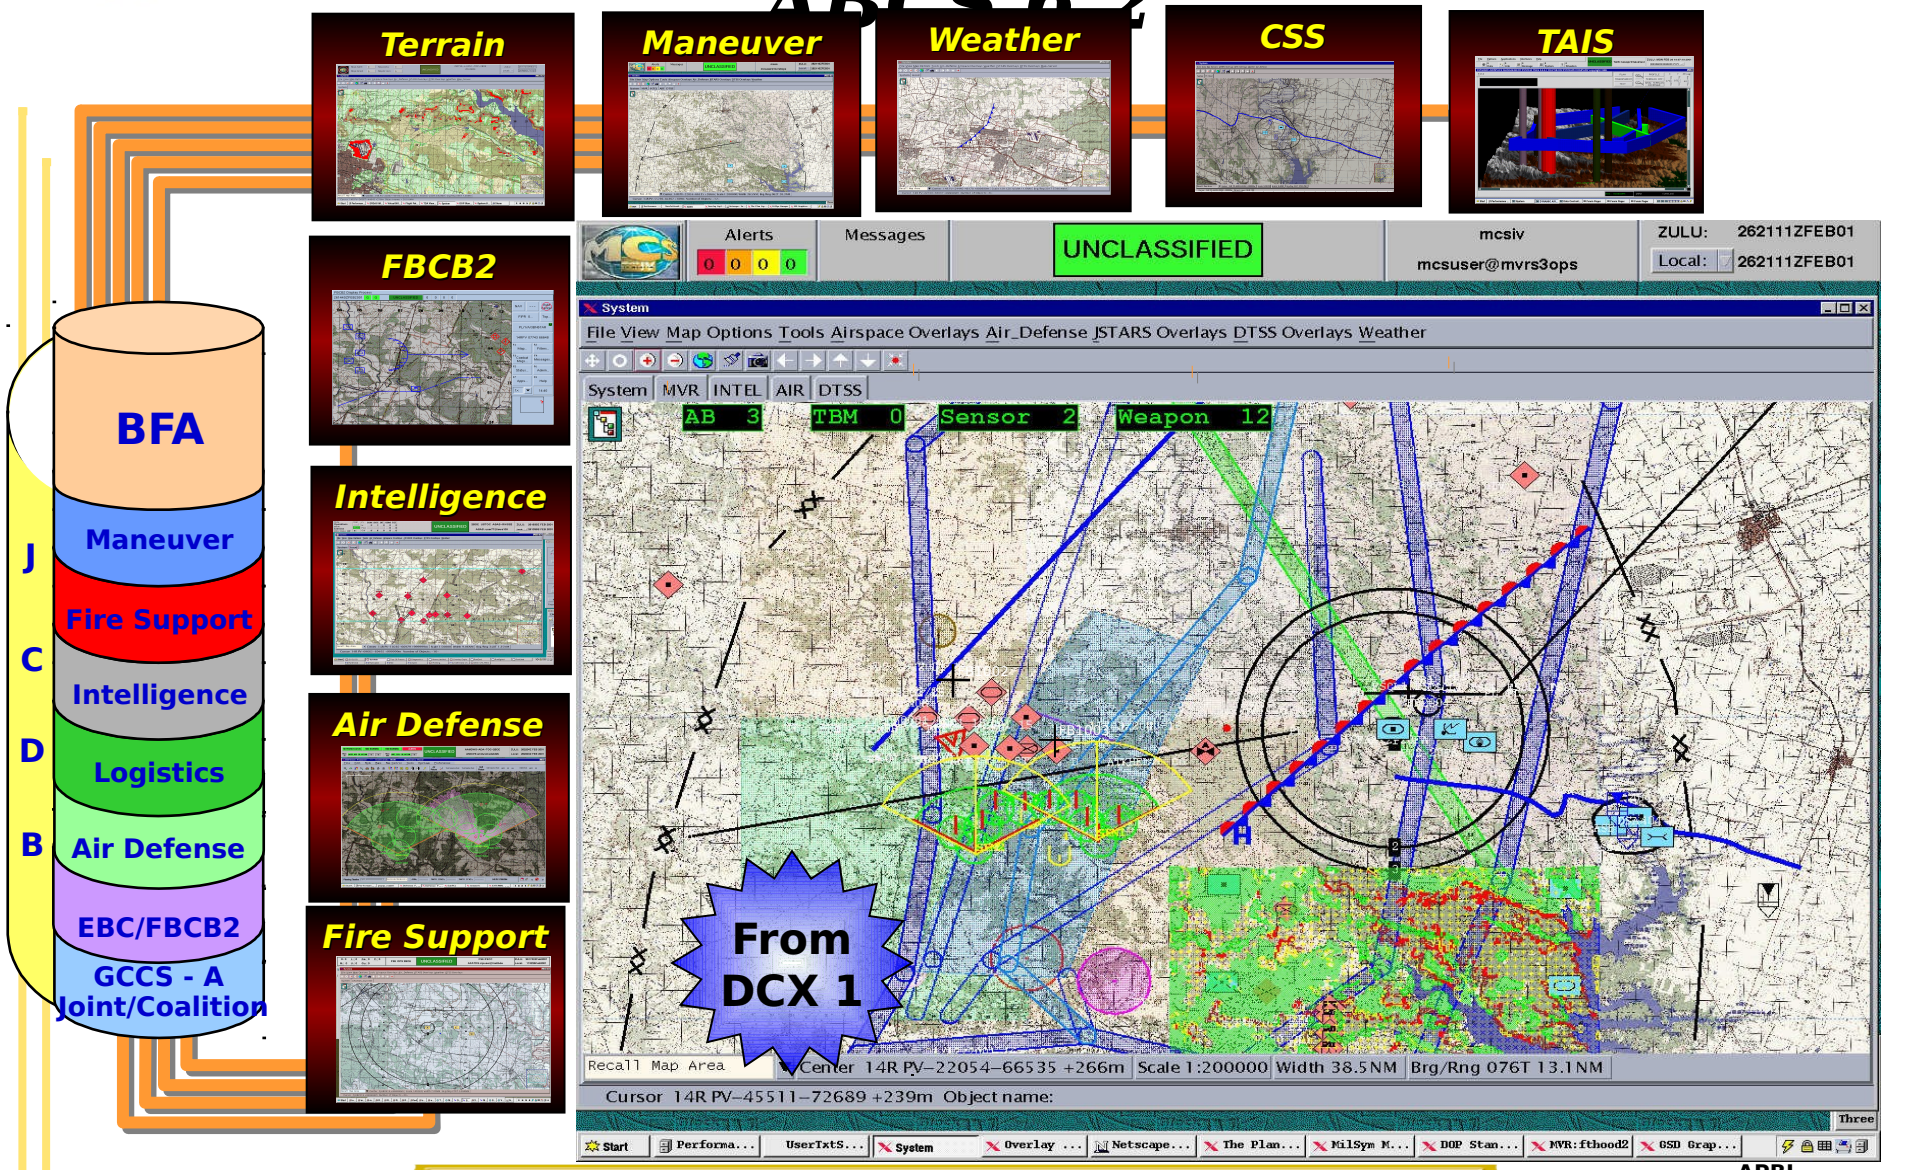
Creating Common Tactical Picture

ABCS 6.2

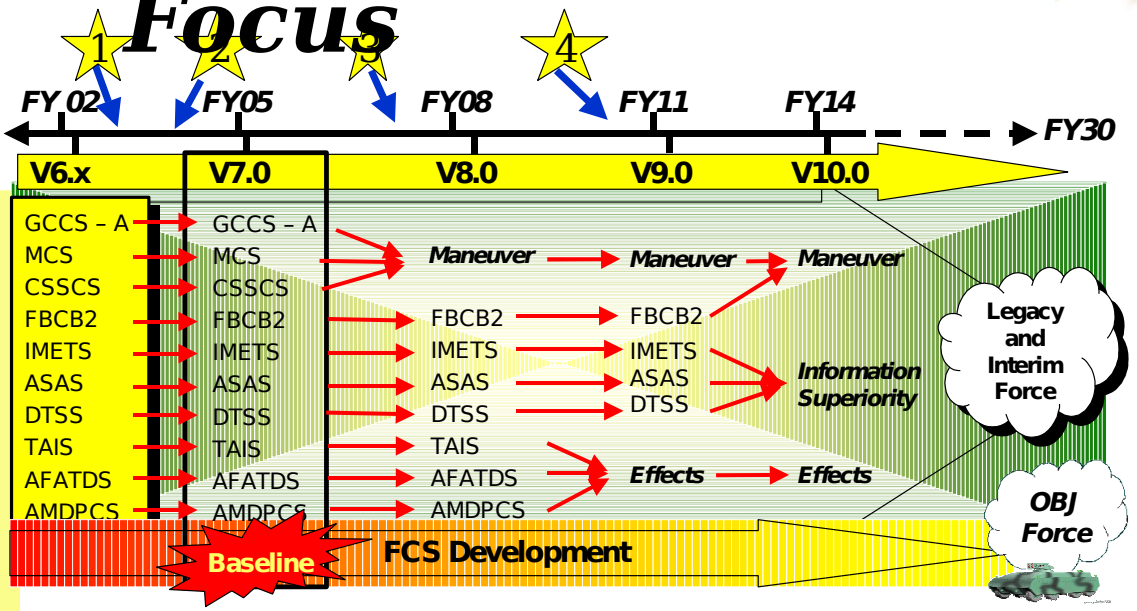


PEO-C3T's Tactical and Strategic Focus

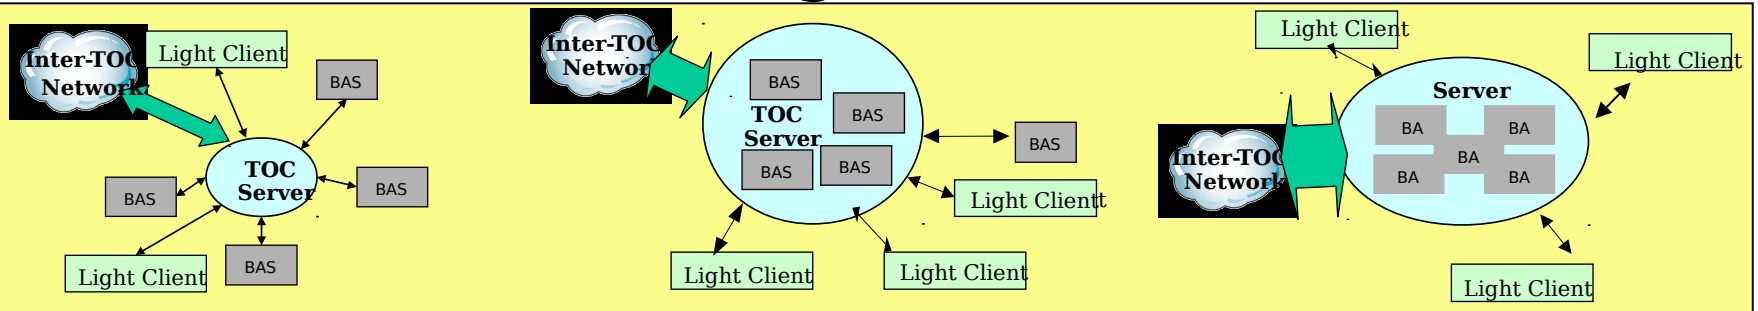
Tactical Focus

Crossing the LD with 6.3

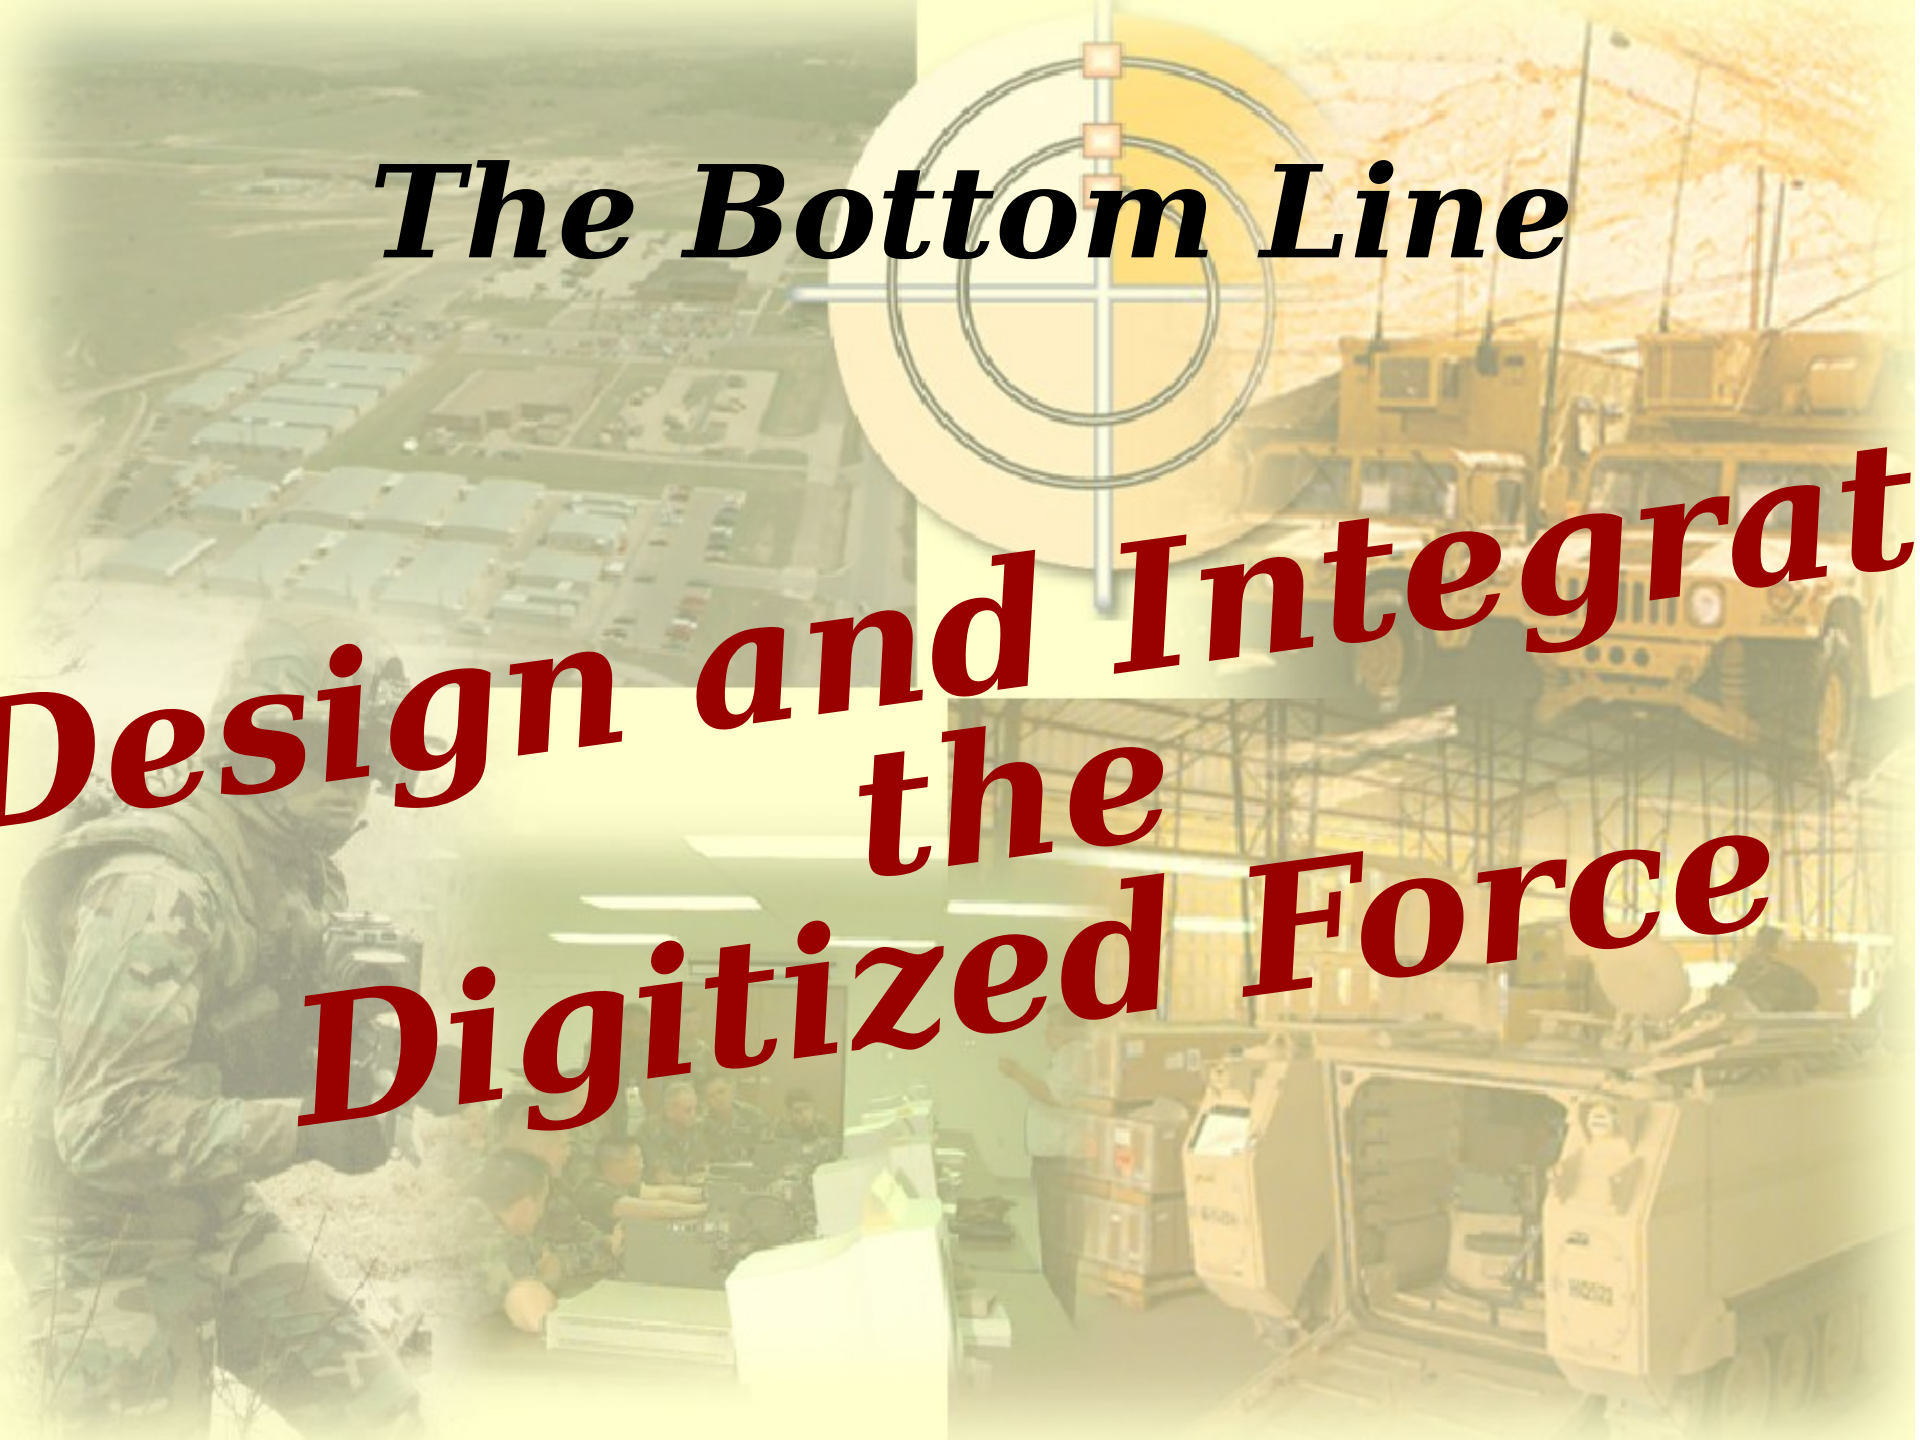
- Strict entrance criteria
- Evaluation guidelines
- Stabilized participants
- Aggressive schedule
- Support concept



Strategic Focus



- **Developing C3 system that supports CA Commander, is less complex, more robust - leads to OF solution**
- **Developing support concept to enable worldwide release of ABCS**
- **Answering growing demand for digitization throughout the Army**



The Bottom Line
Design and Integrat
the
Digitized Force
